**2. Citations and explanations (Rule 70.7)**

The invention relates to a delivery system comprising a body construction and a capsule containing a pharmaceutical composition. The invention further discloses a manufacturing process of the delivery system.

Document cited in the International Search Report:

1. US 4578076 A

The cited document represents the general state of the art.

The invention defined in claims 1-11 is not disclosed by any of these documents.

The cited prior art does not give any indication that would lead a person skilled in the art to the claimed body construction with two locking parts having surfaces adapted to cover the ends of the capsule. Therefore, the claimed invention is not obvious to a person skilled in the art.

According to the arguments stated above, the delivery system and manufacturing process claimed in claims 1-11 is novel, considered to involve an inventive step and have industrial applicability.
